

AI-Powered Data Analyst MASTERCLASS

From Beginner to Advanced – Transform Data into Insights with Analytics & Generative AI

Master data analytics from the ground up using Excel, SQL, Python, Power BI, and Generative AI. Learn to clean, analyze, visualize, and automate data-driven decision-making while leveraging AI tools to accelerate analysis, reporting, and business intelligence.

Course Roadmap (Beginner → Advanced)

01. Data Analytics Fundamentals

- Introduction to Data Analytics
 - Data Types & Sources
 - Analytics Lifecycle
 - Business Problem Solving
 - KPIs & Metrics
 - Data-Driven Decision Making
 - Statistics Basics
 - Analytical Thinking
-

02. Microsoft Excel for Data Analysis

- Excel Interface & Shortcuts
 - Formulas & Functions
 - Data Cleaning
 - Conditional Formatting
 - Lookup Functions (VLOOKUP, XLOOKUP)
 - Pivot Tables & Pivot Charts
 - Dashboards
 - Advanced Excel Techniques
-

03. SQL for Data Analysis

- Database Fundamentals
- SQL Queries
- Filtering & Sorting

- Joins
 - Aggregate Functions
 - GROUP BY & HAVING
 - Window Functions
 - Common Table Expressions (CTEs)
 - Stored Procedures (Basics)
-

04. Python for Data Analytics

- Python Fundamentals
 - NumPy
 - Pandas
 - Data Cleaning
 - Data Transformation
 - Data Analysis
 - Automation Scripts
 - Jupyter Notebook
-

05. Data Visualization

- Matplotlib
 - Seaborn
 - Plotly
 - Storytelling with Data
 - Dashboard Design Principles
 - KPI Visualization
 - Interactive Reports
 - Business Presentations
-

06. Power BI & Business Intelligence

- Power BI Desktop
- Data Import & Transformation
- Power Query
- Data Modeling
- DAX Fundamentals
- Interactive Dashboards
- Publishing Reports
- Power BI Service

07. Statistics & Predictive Analytics

- Descriptive Statistics
 - Probability Concepts
 - Hypothesis Testing
 - Correlation & Regression
 - Forecasting Basics
 - Trend Analysis
 - Time Series Fundamentals
 - Business Insights
-

08. Generative AI for Data Analysts

- Prompt Engineering
 - AI-Assisted Data Cleaning
 - AI-Powered SQL Generation
 - AI for Excel & Power BI
 - Automated Report Generation
 - ChatGPT for Analytics
 - AI Data Interpretation
 - AI Productivity Workflows
-

09. Advanced Analytics & Capstone Projects

- End-to-End Data Analysis Projects
 - Sales Dashboard
 - Financial Analytics
 - HR Analytics
 - Customer Segmentation
 - Marketing Analytics
 - Business Case Studies
 - Portfolio Development
-

Hands-on Projects

- Sales Performance Dashboard
- HR Analytics Dashboard
- Customer Churn Analysis

- Financial KPI Dashboard
 - Inventory Analysis
 - Marketing Campaign Analysis
 - Executive Business Dashboard
 - AI-Powered Report Generator
 - Automated Excel Reporting
 - End-to-End Business Analytics Project
-

Tools & Technologies

- Microsoft Excel
 - SQL Server / MySQL
 - Python
 - Jupyter Notebook
 - NumPy
 - Pandas
 - Matplotlib
 - Seaborn
 - Plotly
 - Power BI
 - Power Query
 - DAX
 - ChatGPT
 - Microsoft Copilot
 - Git & GitHub
-

Career Opportunities

- Data Analyst
- Business Analyst
- BI Analyst
- Power BI Developer
- Reporting Analyst
- SQL Data Analyst
- Operations Analyst
- Marketing Analyst
- Financial Data Analyst
- AI-Enabled Data Analyst

★ Course Highlights

-  Beginner to Advanced Curriculum
-  Hands-on Business Projects
-  Excel, SQL, Python & Power BI
-  Generative AI for Analytics
-  Dashboard Design & Storytelling
-  Data Cleaning & Automation
-  Portfolio-Ready Case Studies
-  Industry Best Practices
-  Interview Preparation
-  Job-Ready Skills

Tagline

"Analyze Smarter. Visualize Better. Accelerate Insights with Generative AI."
